Summary

Story adaptation strategy session detailed narrative frameworks and trailer production workflows through targeted AI implementation.

Story adaptation and framework
The team aligned on the Count of Monte Cristo narrative structure using the StoryBrand SB7 framework. They prioritized psychological depth over physical violence in character arcs.

Trailer production and AI
Leadership mandated a non-cliché trailer strategy focusing on internal transformation. They approved a hybrid casting model using real footage alongside AI-generated character assets.

Commercial objectives and automation
The project targets a year-end completion to ensure market viability. Discussions highlighted the long-term potential of physical AI automation in dangerous industrial environments.

Decisions

Aligned

- **Hollywood-style action trope avoidance** The trailer narrative will utilize a "web of revenge" plot arc, explicitly excluding Hollywood-style sword fighting and physical combat.
- **Hybrid human-AI character strategy** The trailer production will feature the real individual for the main character while utilizing AI-generated visuals for supporting characters.
- **SB7 framework adoption** The project narrative arc will be structured using the SB7 story brand framework.
- **Common cliches avoidance** The creative direction will prioritize original, classy storytelling over relying on generic action movie cliches.
- **Higsfield tool adoption** The production team will utilize a Higsfield subscription for the AI-generated trailer.

We've **updated the Decisions section** using your feedback.

Let us know what you think: Helpful or Not Helpful

Next steps

- ☐ [Ananthu Vijayan] Watch PBS Series: Watch the PBS series about the Count of Monte Cristo to understand the narrative arc and character development.
- ☐ [Ananthu Vijayan] Create Claude Project: Create a new project in Claude to organize research materials and plot references for the storyboard.
- ☐ [Philip Samuelraj] Send Photos: Send digital photos to Ananthu to be used for the AI character generation.
- ☐ [Ananthu Vijayan] Subscribe to Higsfield: Purchase a subscription for Higsfield after the finalization of the storyboard.

Details

- **Storyboard Feedback**: Philip Samuelraj complimented the storyboard build-out by Ananthu Vijayan but requested specific refinements before proceeding. Philip Samuelraj advised Ananthu Vijayan to watch a PBS series adaptation of the novel *The Count of Monte Cristo* for better narrative context, noting it captures the core themes of revenge better than the French movie adaptation, which relies heavily on combat.
- **Plot Context and Historical Inspiration**: Philip Samuelraj outlined the original story arc, beginning with the protagonist Edmund Dantes, a sailor arriving in the port of Marseilles who stops in Elba in 1850. Philip Samuelraj highlighted how the original novel weaves in historical incidents, such as the exile of Napoleon, and explained the plot device involving a letter that leads to Dantes being branded a traitor. The discussion included the character Abbe Faria, who served as an inspiration to Alexander Duma and was a priest from Goa.
- **Character Arc and Transformation**: Philip Samuelraj described the evolution of the character Edmund Dantes from a naive, happy individual to a person transformed through the mentorship of Abbe Faria. The story involves imprisonment, learning from the priest, escaping, and finding treasure. Upon returning, Dantes faces the death of their father and plots a sophisticated revenge. Philip Samuelraj emphasized that the original novel's portrayal of Dantes is distinct from film adaptations, as Dantes relies on linguistic skills and changes in body language rather than brute force.
- **Revenge Mechanics and Thematic Conclusion**: Philip Samuelraj clarified that the revenge in the novel is orchestrated so that the antagonists' own actions lead to their downfall, rather than through physical violence. Specific fates include the prosecutor Wilford going mad after their son is exposed, Fernand killing themself, and Danglars losing their wealth. Philip Samuelraj noted that the core philosophy of the Count of Monte Cristo is captured in the phrase "wait and hope."
- **Trailer Strategy and Plot Adaptation**: Philip Samuelraj stressed avoiding "Hollywood-style" fighting in the AI-generated trailer, which they described as

comical and clumsy. Instead, they proposed a more realistic, "web-like" plot consistent with the novel's themes. Philip Samuelraj suggested adapting the setting to the 1990s, potentially weaving in conflicts like the Liberation Tigers of Tamil Eelam versus India. The trailer needs to remain concise, aiming for a two-minute runtime, and should focus on internal transformation rather than heroic tropes.

- **AI-Driven Storytelling and Casting**: Philip Samuelraj recommended using the AI model Claude to assist with developing plot lines and managing project references. For the trailer casting, Philip Samuelraj suggested incorporating team members from their office as characters. Ananthu Vijayan proposed having the main character played by a real person while generating others via AI. Philip Samuelraj agreed and committed to providing photos of themself for this purpose.
- **StoryBrand SB7 Framework**: Philip Samuelraj introduced the StoryBrand SB7 framework by Donald Miller as a structural guide for the film's narrative arc. The model involves identifying the hero, presenting a problem, introducing a guide, providing a plan, and achieving success. Philip Samuelraj emphasized that their trailer should clearly follow this seven-step progression to ensure narrative depth and avoid the superficiality often found in AI-generated videos.
- **Production Goals and Public Engagement**: Philip Samuelraj emphasized that for the film project, the team must avoid simply stitching together short AI clips. They aim to create a high-quality, complex production. Philip Samuelraj expressed an interest in generating significant public discourse, including negative media, to create a "big first" announcement for the project, viewing this as a way to gain attention.
- **Commercial Success and Workflow**: Philip Samuelraj discussed the definition of success, stating that it depends on whether customers are willing to pay for the final product, regardless of critics' opinions. They also discussed creating a custom workflow using Claude to manage version control and multiple iterations for the project, avoiding generic software tools. Philip Samuelraj instructed the team to avoid clichés, such as stereotypical character mannerisms, in favor of a classier, more unique approach.
- **Project Timeline and Launch Objectives**: Philip Samuelraj set a goal to complete the film by the end of the year to avoid market saturation. Ananthu Vijayan and Philip Samuelraj agreed to target a trailer launch within a few weeks.

To proceed, Ananthu Vijayan confirmed they would need a subscription to "Higsfield" for video generation. Philip Samuelraj committed to providing various photos of themself for character generation.

- **Physical AI and Future Automation**: Philip Samuelraj shared an update on Tesla's Full Self-Driving software, highlighting its efficiency improvements through model distillation. Philip Samuelraj connected this to their vision for "Physical AI," arguing that dangerous, controlled environments like mines and factories should be fully automated using robotics and remote monitoring. They suggested that this will eventually become a major line of business for the company.
- **Room Logistics**: Aparna Pillai informed the team that they have received permission to use the "Idea room" for the project for the duration of one week. They instructed the team to use other conference rooms if the space is needed by others.

TJ originals - Transcript

00:00:47

Ananthu Vijayan: Bye. Huh?

Aparna Pillai: You're lucky.

Ananthu Vijayan: message. Uh um

Aparna Pillai: I don't like storyboard. It's turn up by GN.

Ananthu Vijayan: when you start when film

Aparna Pillai: Any

Ananthu Vijayan: director.

Aparna Pillai: definition? You pay any indignation?

Ananthu Vijayan: Open up.

Aparna Pillai: Okay.

Ananthu Vijayan: I just haven't

Aparna Pillai: Let him open up airport. Yeah. Hi

Ananthu Vijayan: Hey.

Philip Samuelraj: Hi Ba. Hi Anto. Sorry for being a few minutes late.

Ananthu Vijayan: Yeah.

Philip Samuelraj: Cool. Anand first off I wanted like fantastic um storyboard build out um uh loved it

Ananthu Vijayan: Thank you. Thank you.

Philip Samuelraj: right but I wanted a few more clarifications few more changes before we okay I really

Ananthu Vijayan: Okay.

Philip Samuelraj: so let me talk about the one the story in itself right did you watch the PBS

Ananthu Vijayan: No,

Philip Samuelraj: Please,

Ananthu Vijayan: I didn't watch the PBS series. I think it's a bit to get that from India.

Philip Samuelraj: you can't get that.

00:03:57

Philip Samuelraj: Huh? Prime video. It's available in Prime. Amazon Prime.

Ananthu Vijayan: Amazon Prime the other one is only there I think like the one which I watched I

Philip Samuelraj: PB series is not there.

Ananthu Vijayan: didn't see

Philip Samuelraj: Are you sure? It should be. Find find it and watch it because why I want to watch it

Ananthu Vijayan: Sh.

Philip Samuelraj: is the one the French movie that you pick right it's a Hollywood style adaptation the story is actually much more powerful very powerful story it's considered one of the best novels ever and there is no sword fight no fighting and all involved in the

Ananthu Vijayan: Okay. Okay.

Philip Samuelraj: story the core Crux of the story is actually revenge and it is very

Ananthu Vijayan: Uh,

Philip Samuelraj: beautifully done in the that story. Movies struggle to typically movies struggle to capture it. The PBS series actually captures it quite well.

Ananthu Vijayan: okay.

Philip Samuelraj: Okay.

Ananthu Vijayan: Okay.

Philip Samuelraj: So I would love for you to watch it.

Ananthu Vijayan: Okay.

00:05:02

Philip Samuelraj: And here's this full story, right? This is what happened like Edmund Dante Dantes is like a happy golucky guy. He's basically a sailor. He comes to the port of Masai.

Ananthu Vijayan: Hey,

Philip Samuelraj: M A R S E I L L E. Masai it's called in French. He comes to the port during while

Ananthu Vijayan: thanks.

Philip Samuelraj: coming before coming to that port he actually stops in Elba in 1850 in Elba.

Ananthu Vijayan: Okay.

Philip Samuelraj: So then this movie you would have seen like he goes and rescues a lady right

Ananthu Vijayan: Yeah.

Philip Samuelraj: Anel that's not a character in the story at all.

Ananthu Vijayan: Yeah.

Philip Samuelraj: So the one of the things that the novel does really well is it weaves real life incidents from history as well.

Ananthu Vijayan: Okay then.

Philip Samuelraj: So Napoleon was exiled in Elba. So he meets Napoleon well or he's like he goes to Elba and he is given a one letter that he has to give to somebody. So he have he's a sailor.

Ananthu Vijayan: Okay.

00:06:13

Philip Samuelraj: He doesn't even look at it. Okay, I'll give it to someone in Paris in sorry in Marseilles and he just brings it.

Ananthu Vijayan: Okay.

Philip Samuelraj: This is the letter that they use to

Ananthu Vijayan: H.

Philip Samuelraj: brand Edmund Dante as a traitor to the government.

Ananthu Vijayan: Okay. Okay.

Philip Samuelraj: You understand? And the plot thickens is that the guy he was supposed to give the letter to

Ananthu Vijayan: Yeah.

Philip Samuelraj: is actually you know Wilford the character the prosecutor that guy's

Ananthu Vijayan: See again.

Philip Samuelraj: dad.

Ananthu Vijayan: Oh.

Philip Samuelraj: That's why Wilford also realizes this guy must be imprisoned. They imprison him in thehat. Okay, it's the same Abbe Faria comes in actually you know interesting connection. Uh this is not so important for us. Abbe Faria the real life Abbe Faria who u

Ananthu Vijayan: Uh-huh.

Philip Samuelraj: Alexander Duma took inspiration from is actually a goan kani uh priest who went to Portugal at that

Ananthu Vijayan: Uhuh.

Philip Samuelraj: time and then lived and died in Paris that time 300 400 years back.

00:07:27

Philip Samuelraj: So you took inspiration from him like the same right mad guy he spoke many languages his

Ananthu Vijayan: Okay.

Philip Samuelraj: mother tongue was kani but he spoke Portuguese he spoke French blah blah and all of that so that's how Alexander Duma characterized aaria

Ananthu Vijayan: Okay.

Philip Samuelraj: and there's a huge transformation in the character if you look at it before um uh till before this Edmund is very naive He's just happy golucky. Everything is happy.

Ananthu Vijayan: 3.

Philip Samuelraj: He's in love. He wants to get married and all of that. And then there's this prison where he's actually foolish. He's like not doing anything. He's like trying to do a fara meets.

Ananthu Vijayan: Yeah.

Philip Samuelraj: As soon as a fara becomes the guide, he takes him more like a son. He starts teaching him and all of that is skipped in the movie. So this raw guy now gets a lot of learnings at the feet of Abbearia who is the priest who also tells him about the

Ananthu Vijayan: H.

Philip Samuelraj: treasure and then he escapes.

00:08:41

Ananthu Vijayan: H.

Philip Samuelraj: Um and then he goes to find the treasure. Then he comes back and he sees that the world has changed.

Ananthu Vijayan: Oh.

Philip Samuelraj: His dad has passed away and he spends time plotting revenge. He wants revenge. He wants that and that's what you say like that revenge is keeping me alive because he doesn't have anybody else other than wealth. So there are a few more characters in that right which is the ship owner who used to be good for him.

Ananthu Vijayan: Okay.

Philip Samuelraj: He would have uh so what he would do he would actually uh make sure that the ship you know he gets more money the ship owner's do son would be in love with actually the will's daughter so he'll make sure they get married things like that so many of those that the movie has actually avoided okay so

Ananthu Vijayan: Okay. Okay.

Philip Samuelraj: that's why you watch the TV series just for more context reading the

Ananthu Vijayan: Okay.

Philip Samuelraj: policy in The original version is thousand pages.

00:09:43

Ananthu Vijayan: Okay.

Philip Samuelraj: That can take so long.

Ananthu Vijayan: Uhuh.

Philip Samuelraj: And then the ultimate is he comes back and he um the one part is you know in the original he's not wearing a mask like Pier Nini did in no mask nothing. It's just that you know he's like very raw rugged you know young 19 year old 18 19 year old guy can speak only

Ananthu Vijayan: Hey,

Philip Samuelraj: uh you know coarse French now speaks Italian now speaks English now

Ananthu Vijayan: hey,

Philip Samuelraj: speaks French and he's very it's 20 more than 20 years passed he's so nobody except for Mercedes even guesses that it is

Ananthu Vijayan: hey.

Philip Samuelraj: You understand the very rift manners and so on body everything from a body language and so on

Ananthu Vijayan: there.

Philip Samuelraj: becomes very very different for Edund Dantes and the most interesting part about the

Ananthu Vijayan: Oh.

Philip Samuelraj: revengers it's not nothing is brute force you understand his he's he he's also not saying oh you did that to me I'm going to you know make sure you get into a car accident you get hurt all of that.

00:11:03

Philip Samuelraj: No, everything he orchestrates revenge in a such a way that people's actions actually catch up with themselves.

Ananthu Vijayan: Okay.

Philip Samuelraj: You understand?

Ananthu Vijayan: Yeah.

Philip Samuelraj: That's the most interesting part about the

Ananthu Vijayan: Yeah.

Philip Samuelraj: revenge. And in the movie in the com uh the French movie you would have seen Haiti um you know kind of falling in love with the

Ananthu Vijayan: Wait,

Philip Samuelraj: um Mercedes son and so on. That plot line is not in the novel at all.

Ananthu Vijayan: where am

Philip Samuelraj: That plot line is completely not in the novel. Okay.

Ananthu Vijayan: I?

Philip Samuelraj: So in the what happens is purely Haiti you know make sure she takes revenge. There's no love but there's a court case that comes where Haiti speaks about Ferand and Fernand you know is shamed his wife and son leave Mercedes and Al Albert Albert leave him and then Span came kills himself.

Ananthu Vijayan: You

Philip Samuelraj: So the revenge across all of those right actually is like Wilford will be caught in

Ananthu Vijayan: got

Philip Samuelraj: prison I think in the original novel you we we can take a look you can Google and find as well or use chat GPT cla to do it Wilford let me actually take a look at

00:12:21

Ananthu Vijayan: Okay.

Philip Samuelraj: What happened? Um, perman killed himself because of all of these things down there. Um, oh yeah, yeah. Uh, Wilford becomes mad. Okay. He has this trial. Uh, he will,

Ananthu Vijayan: Thanks.

Philip Samuelraj: um, uh, actually prosecute the case, not realizing that the defendant is his own son until his name's character is Benedto. He exposes him in open court and he'll be publicly ruined and flee the courtroom. when he goes home. Okay, his wife would have poisoned herself and her their son.

Ananthu Vijayan: Oh,

Philip Samuelraj: Okay, on seeing all of this then the Monte Cristo Edmund would come out and say hey

Ananthu Vijayan: okay.

Philip Samuelraj: I am actually Edmund Dante. Then Wilfort will become mad.

Ananthu Vijayan: Huh?

Philip Samuelraj: So that's the revenge against Wilfort the prosecutor.

Ananthu Vijayan: Okay.

Philip Samuelraj: He becomes mad. the revenge against uh Fernandez,

Ananthu Vijayan: Okay.

Philip Samuelraj: he kills himself. Okay. Danglers will become a popper, will lose all his money, right?

00:14:01

Philip Samuelraj: And then he's like because he's fully after money at the end, he'll be like nothing and then he has to start fresh.

Ananthu Vijayan: Okay.

Philip Samuelraj: Okay.

Ananthu Vijayan: Okay.

Philip Samuelraj: Yeah, his danglas also his wife will leave him. Um he will be actually caught as a prisoner. He'll be starved and then he after he feels real hunger, desperation and all of those things then um uh Danglas will be left alive. Okay.

Ananthu Vijayan: Okay.

Philip Samuelraj: Cardarus. Oh yeah, he'll he'll also die by his own grief. But um this is and he plots it all so that revenge is complete. And at the end the most famous statement of uh the count of monto is um uh wait and hope. All human wisdom is contained in these two words which is wait and hope. Okay. So, uh that's what he says and he leaves. So, this is the story arc and I think you captured some of it but some of the stories we've actually picked

Ananthu Vijayan: Oh,

00:15:51

Philip Samuelraj: from the movie like the sword fight and so on is absolutely not okay.

Ananthu Vijayan: there. Okay.

Philip Samuelraj: It actually makes it comical and clumsy.

Ananthu Vijayan: Okay.

Philip Samuelraj: I think because we have AI uh creating it, we can actually create more powerful plots. the more powerful realistic plot. There's no need for Hollywood style action at this point.

Ananthu Vijayan: Okay then.

Philip Samuelraj: Okay. And weaving in one of the most beautiful things that I saw that you did very similar to

Ananthu Vijayan: Okay.

Philip Samuelraj: Dumas is that you weaved in the tsunami story, right? The same way one of the ideas that I had which was say in the '9s um the seas were all uh you know dominated by LGTE versus India conflicts at this time.

Ananthu Vijayan: Okay.

Philip Samuelraj: So maybe there is a plot line which we can actually do something like even the rescue right rescuing

Ananthu Vijayan: Okay.

Philip Samuelraj: somebody then was actually somebody from the LT or so on and so our hero gets branded as a traitor for helping the LT or something like that even though it was

00:17:00

Ananthu Vijayan: Okay,

Philip Samuelraj: harmless that puts in the '9s plotline

Ananthu Vijayan: then.

Philip Samuelraj: uh very similar Okay. Two more uh another thing is we can't also capture exactly the same story and apply it to the '9s and 2000. For example, here when somebody dies or so on,

Ananthu Vijayan: Oh.

Philip Samuelraj: nobody throws them into the sea. You understand? That cannot be a plot line in India at this point of in the 2000s.

Ananthu Vijayan: Okay.

Philip Samuelraj: So we have to come up with a better

Ananthu Vijayan: Okay.

Philip Samuelraj: idea or even at the same time like for example um like the tsunami um he escapes um and then uh uh people think he is That But he escapes. I'm just making it right. But we have to look at timelines and so on so that they actually match.

Ananthu Vijayan: Okay.

Philip Samuelraj: Hero escapes so on and then comes back. We can actually weave in a lot of these things, right? Revenge is not also immediate. After actually coming here, he sees the change that has happened.

00:18:15

Ananthu Vijayan: Oh,

Philip Samuelraj: He goes away, creates you know uh builds his business, builds his you know reputation so on and he becomes so big that he can come back and take revenge and we don't need all of these things

Ananthu Vijayan: I don't know.

Philip Samuelraj: determined for the trailer.

Ananthu Vijayan: Oh, there it is.

Philip Samuelraj: You understand? All of these are like this is we need only a two-minute

Ananthu Vijayan: Yeah.

Philip Samuelraj: trailer. Sounds good.

Ananthu Vijayan: Yeah.

Philip Samuelraj: Another part is also right even from a storytelling right doesn't have to be heroic storytelling like uh we know that right hey when you open like hey there's

Ananthu Vijayan: Oh,

Philip Samuelraj: a picture the hero picture then mom and dad and like hey tell the story in those likes we don't need heroic storytelling as well we need it truly to be

Ananthu Vijayan: what the

Philip SamuelRaj: a the crux should be you know what's captured In the novel, the the innocence, the transformation, and the brutal revenge, but the revenge is not it's not nobody's flying,

Ananthu Vijayan: Oh.

Philip SamuelRaj: nobody is fighting, no sword fight and all of that.

00:19:42

Philip SamuelRaj: It's like this web that the Count of Mona actually draws

Ananthu Vijayan: Oh.

Philip SamuelRaj: that all of them fall into and that's how he takes revenge.

Ananthu Vijayan: Okay. Okay.

Philip SamuelRaj: Cool.

Ananthu Vijayan: Yeah.

Philip SamuelRaj: Any questions?

Aparna Pillai: Yep.

Philip SamuelRaj: Um, okay. Any questions on the story line? We'll go go ask me

Aparna Pillai: Oh, okay.

Philip SamuelRaj: anything.

Ananthu Vijayan: Everything is clear actually. I have taken notes of it.

Philip SamuelRaj: That's also yeah we have this is recording as well right you can take do this

Ananthu Vijayan: Yeah.

Philip SamuelRaj: research and plot lines also maybe you can create a cloud project um uh with these references and so on and claude gives really good brilliant ideas as well on these things so now for the trailer I think with just

Ananthu Vijayan: There.

Philip SamuelRaj: these um uh you should the next version that you come with I'm very kind will already be 90% there and we'll take care of it.

Ananthu Vijayan: H.

Philip Samuelraj: Okay. Another for characters I would love for us to not only just put AI characters some more people from our office it that's also because like created by techjs and it should be like hey tech's people are characters you want to play a role Noah, but how do we get them or do we not get them for the trailer then?

00:21:43

Philip Samuelraj: Seeing how the trailer is there, we can of course change the stuff. See the other part though is that not all the scenes in the trailer have to be in the movie. All of those things as well. This is purely you know what we're doing

Ananthu Vijayan: Yeah,

Philip Samuelraj: to is to create a big uh big first.

Ananthu Vijayan: maybe in the trailers we can uh the main character alone we can have the real person and others we can generate with the

Philip Samuelraj: Okay. Sounds good.

Ananthu Vijayan: AI.

Philip Samuelraj: Okay. Wonderful. I'll give you all of my pictures. Whatever pictures you want, whatever I have, I'll give you. You can even change me a little bit.

Ananthu Vijayan: Okay.

Philip Samuelraj: Do whatever updates you want to make it look good. Some of the pictures I like very much. I don't know. I I look this good. Thank you very much. That's how it should be. and oh another good

Ananthu Vijayan: My Yeah, my brother generator is

00:22:56

Philip Samuelraj: go

Ananthu Vijayan: actually

Philip Samuelraj: send my louder. Okay. Um, another part that I want to like slowly um, take a minute. I want to want you to there's one book Just a minute. Let me look for the book. Alexa, turn on the light. How can I not find that? And a problem. Building a story brand. Exactly. By Donald Miller. Okay. Make a note of that. And that book if let me just quickly share my screen.

Ananthu Vijayan: Oh,

Philip Samuelraj: So it's not this anything. I'm just using Google Gemini search Gemini a um it's called the story brand SB7 framework okay which is classic and you will see that once you see this you will see um everywhere uh uh this actually playing in okay this is the classic any superhero movie any movie this is the seven almost seven steps that You can almost see all right is one is

Ananthu Vijayan: What the

Philip Samuelraj: the character the hero is the main focus somehow that's usually the first part of the movie introducing the

00:25:55

Ananthu Vijayan: hell?

Philip Samuelraj: hero introducing the hero's character he's a good guy he's funny he has this blah blah blah all of that he will always meet a problem typically Indian movies put like a

Ananthu Vijayan: Okay.

Philip Samuelraj: villain you put a villain. Uh but here even in the Edmund he's like he meets a problem and that problem culminates on the day of his wedding. Correct? External internal and philosophical challenges but he is right now in

Ananthu Vijayan: Yes.

Philip Samuelraj: prison. There he meets the guide who is the priest. All right. who gives them a plan and a way out which is the education,

Ananthu Vijayan: Okay.

Philip SamuelRaj: the skills and all of that. He learns everything what needs to be done. He completely transforms plus he gives the gets the uh information about the treasure being held. Okay, this is that to cause them to action to basically change them blah blah and all of that helps avoid failure or list now is like hey he wants to go and he

Ananthu Vijayan: Okay.

00:27:14

Philip SamuelRaj: redefineses his life as the last the part as taking revenge he himself orchestrates he ends in success all of the

Ananthu Vijayan: Oh.

Philip SamuelRaj: revenge is complete so if you look at it this is the SB7

Ananthu Vijayan: Oh.

Philip SamuelRaj: framework take a look at it because that's how uh things roll. That's our our story follows that arc and it should be very

Ananthu Vijayan: Okay.

Philip SamuelRaj: clear from a trailer perspective.

Ananthu Vijayan: Okay.

Philip SamuelRaj: The next parts that I'm looking at is the depth. You understand? One of the things that AI films are now trashed is that you can't just simply prompt get a 10 uh second uh video, get two 20 of those videos and call that's a 3 minute 20 second or get 12 of them, stitch them together and an AI trailer. The thoughtfulness behind it and that's why I was excited by the storyboard as well because it's very thoughtful.

Ananthu Vijayan: Oh,

Philip SamuelRaj: The depth is there. we we have to create real life is very complex and depth whenever we put it in 2D uh it actually simplifies it greatly right

00:28:30

Ananthu Vijayan: there we go.

Philip Samuelraj: I think that's what people are missing when they see an a video as long as we make sure all of these have this complexities the depth and those things I think we should be fantastic Okay.

Ananthu Vijayan: That's

Philip Samuelraj: So, lovely. Um, continue to watch the BB PBS series.

Ananthu Vijayan: okay.

Philip Samuelraj: It'll be great.

Ananthu Vijayan: Okay.

Philip Samuelraj: Watch it and let's get

Ananthu Vijayan: Ouch.

Philip Samuelraj: the I'll you you need me to send all of the pictures, right? I'll send as much as I have.

Ananthu Vijayan: Yeah.

Philip Samuelraj: Um, even you see,

Ananthu Vijayan: Yeah.

Philip Samuelraj: here's the part, right? The younger me um the younger me as well doesn't have to exactly match how I look in a younger fashion. You can make some changes to how you know the story has to look uh as as as close as possible. Older me, I think I'm very good-looking as a hero.

Ananthu Vijayan: Yeah.

Philip Samuelraj: Right. Very refined. No, but overall the whole idea is jokes apart right the whole why is if we fully create with also AI characters and so on we are not putting skin into the game we saying

00:30:11

Ananthu Vijayan: Come

Philip Samuelraj: hey this is possible this is actually the people we are putting ourselves out there so if you want to

Ananthu Vijayan: on.

Philip Samuelraj: have uh a character whatever character you choose you choose

Ananthu Vijayan: That's

Philip Samuelraj: Okay. And see also what we should do is this is just the beginning.

Ananthu Vijayan: Okay.

Philip Samuelraj: My idea is if we get a really cool video that will actually rattle some waves.

Ananthu Vijayan: Come on.

Philip Samuelraj: We'll do some big announcement blah blah blah all of that. We'll spend throw a lot of money. We'll have like u uh like a real film announcement. We'll hire some you know stars to come and speak. A is coming blah blah and create a huge ruckus. We'll at least get a lot of negative media. You know people will be saying why people we we we want a lot of negative media because a lot of people is saying hey I can't really you know do human emotions blah blah blah blah or people will be saying hey is taking people's jobs what will happen to all of these people if blah blah blah will create definitely generate a lot of negative media but ultimately in any business if you look at it right it's about can

00:31:32

Ananthu Vijayan: Mhm.

Philip Samuelraj: you build a product or a service that people are willing to pay for. Do you get it? It's the same right?

Ananthu Vijayan: Definitely.

Philip Samuelraj: For example, because we are talking about movies, I'll say, however critics write about the movie, would Anandu pay 100 rupees or 200 rupees to watch that movie? And will he say, hey family, actually that's a very good movie. You can go and watch it's money's worth. That is all. Same with respect to products. People say uh pizzas are very bad for health. Who cares, you like it, you want to eat it next time, you'll go correct you. So ultimately that is it.

Ananthu Vijayan: There

Philip Samuelraj: But we need to definitely make that big impact on this side. Uh we need to also have the framework. The other part was like you know how do we quickly create the storyboard? How do we manage it?

Ananthu Vijayan: heat.

Philip Samuelraj: How do we manage multiple iterations, multiple iterations of delivery?

00:32:43

Philip Samuelraj: All of those things that people use gen generic software tools. I think we can build something with cloud which is really cool, very helpful for us. We are able to you know generate as much as possible, manage, do version control and all of those things. Okay. Cool.

Ananthu Vijayan: Okay.

Philip Samuelraj: Um, another general guideline is if there are just cliches, don't need to throw in a lot of cliches. what I mean why we don't shouldn't throw a lot of cliches right for example the same right um everybody will expect the guy to actually blow uh you know cigar smoke or something like that we should continue to think about not just the same cliche but how do we make it

Ananthu Vijayan: Yeah.

Philip Samuelraj: actually different how do we make it classy because there are so many options maybe one version we try with the cigar hey one we should try differently and see how that happens all of this is for the main movie, for the trailer, don't overthink it. The only thing is we need to get to it as soon as possible.

00:34:04

Ananthu Vijayan: Okay.

Philip Samuelraj: Right? If there is a movie, we want to launch by end of year.

Ananthu Vijayan: Okay.

Philip Samuelraj: They want to make the movie by end of year because by end of year there are going to be lots of competition. People are going to start making movies. Elon also has said that he wants to make Odyssey by end of year with only white people. This Odyssey he doesn't like because black people are

Ananthu Vijayan: I'm

Philip Samuelraj: there.

Ananthu Vijayan: done.

Philip Samuelraj: Okay. Any other questions?

Ananthu Vijayan: No, nothing as of now.

Philip Samuelraj: Um so uh I'll I'll talk to Apa as well. That's the whole part right. I want us to get to very fast. We should at least get like you know target like a trailer launch and all in a week's week's time few weeks

Ananthu Vijayan: Oh,

Philip Samuelraj: time something that's really

Ananthu Vijayan: okay. Okay.

Philip Samuelraj: good. Okay. And what do you need from

Ananthu Vijayan: For now,

Philip Samuelraj: me?

00:35:20

Ananthu Vijayan: I just need some images actually. And once the storyboard is finalized, we can take subscription for Hicksfield or something. Higsfield will work actually.

Philip Samuelraj: I will give all

Ananthu Vijayan: Okay.

Philip Samuelraj: subscription.

Ananthu Vijayan: Okay.

Philip Samuelraj: Subscription. I'm looking at pictures of me. I'll send a choose and select

Ananthu Vijayan: Okay.

Philip Samuelraj: Wait a minute.

Aparna Pillai: Let's go. Let's send

Philip Samuelraj: I'll I'll keep sending all of the digital ones that I have.

Aparna Pillai: it.

Philip Samuelraj: I'll try to send uh Okay. I think we can go from it. And as I said,

Ananthu Vijayan: Hey.

Philip Samuelraj: like you know, the younger version of me can we can always some changes. Now I have some college pictures and

Ananthu Vijayan: Um,

Philip Samuelraj: reference but many of them are not great quality. the because those are all what you call it uh taken and film and then scanned. Okay. So, so I'll send it. Let's see how fast we can turn around and we'll take it from there.

00:37:17

Ananthu Vijayan: Okay.

Philip Samuelraj: Okay.

Ananthu Vijayan: Yeah.

Philip Samuelraj: Excited for this.

Ananthu Vijayan: Yeah. Yeah.

Philip Samuelraj: What are you thinking?

Ananthu Vijayan: Actually,

Philip Samuelraj: We are writing history here. Okay.

Ananthu Vijayan: this is what I like to do.

Philip Samuelraj: So my idea is see the whole part is how we build software for other companies is one line of business. What is going to be films will become another line of business. Physical AI is going to be huge. We got a new upgrade. I want to tell you new update to Tesla. Tesla new update to Tesla.

Aparna Pillai: Just Oh,

Philip Samuelraj: I don't drive at all now.

Aparna Pillai: the same one. It got updated.

Philip Samuelraj: The same one got a new update with the older hardware.

Aparna Pillai: Oh, that's nice.

Philip Samuelraj: You know what they did? Interesting. They took the same software learnings from the new hardware H hardware 4. They distilled as many lessons as possible into the previous model. You know, distillation, right?

00:38:27

Philip Samuelraj: It's basically learning from the old uh new models.

Aparna Pillai: That's

Philip Samuelraj: That's what China is all doing.

Aparna Pillai: cool.

Philip Samuelraj: And now it is fantastic. I get into the car in the garage, put the address, start like this and most of the times I'm sleeping in the car.

Aparna Pillai: So you I mean you had the plan of purchasing cyber truck, right? No,

Philip Samuelraj: Oh,

Aparna Pillai: that's not needed.

Philip SamuelRaj: not needed. So, but but another why I'm thing is an opener right now. You think of this is in complex traffic.

Ananthu Vijayan: Oh,

Philip SamuelRaj: Think of how many jobs are done by people which are actually hard jobs. Now think of mining. Who wants to work in a mine? Nobody wants to work in a mine. Why do people work in mines? because they are somehow need money. Mining has the highest death rate in almost any industry.

Ananthu Vijayan: Mhm.

Philip SamuelRaj: Correct? Uh next,

Ananthu Vijayan: Perfect.

Philip SamuelRaj: not only then life expectancy is also very less for them because people go into mines, they inhale this, they inhale that, all of those things, they get cancer, blah blah die early.

00:39:55

Philip SamuelRaj: Mines are controlled environment. See I'm driving in traffic where lots of idiots are also driving. Mines are controlled environments. Soon what I believe is you TJS will have a project where in our office or Aperna will start a coi office by then. In our Kochi office there are 10 people with big cameras monitoring and seeing how all of the missionaries are automatically going in. If something has happened anything and people go in only when there is something that we cannot do to fix even then I think machines will actually go and fix machines will actually go and tow as well very rarely people have to go 99% people don't have to go and it'll be fully remotely monitored we will have a project that way then you understand physically

Ananthu Vijayan: Mhm. Yeah.

Philip SamuelRaj: Same way lots and lots you can see right for example soon trucking running trains and so there are so many factories generally if you look at it lot of factories are very hard to manage as well especially when there is fire involved

00:41:20

Ananthu Vijayan: Mhm.

Philip Samuelraj: Right? Smeltering involved, blah blah.

Ananthu Vijayan: Yeah.

Philip Samuelraj: All of those things, all of those things can be very well automated because those are all controlled environments, not uncontrollable environments like roads. There I can design everything where one one robot does this, another robot does this, another robot does this, another robot does this. End of story.

Ananthu Vijayan: Mhm.

Philip Samuelraj: So physical AI is huge. We are going to do physical AI. So we'll do lots and lots. You can own the films division. We make the success. You can fully be in films division. Okay.

Ananthu Vijayan: Yeah.

Philip Samuelraj: Uh I'll send uh pictures uh right now as much as possible.

Ananthu Vijayan: Oh.

Philip Samuelraj: uh you can pick up uh from then current pictures. Do you need any or what what ages do you need?

Ananthu Vijayan: ones and the ones in 20s or 24s.

Philip Samuelraj: Okay, those are the ones that I'm sending. H current ones you have or you need more?

00:42:41

Ananthu Vijayan: I need more.

Philip Samuelraj: You need more. Huh?

Ananthu Vijayan: Yeah.

Philip Samuelraj: I even have young baby ones that you don't need, right?

Ananthu Vijayan: that I don't

Philip Samuelraj: Cool. I'll I'll send everything to Aperna. You two talk. Okay. I'll I'll jump off.

Ananthu Vijayan: Okay. Okay.

Aparna Pillai: Are

Ananthu Vijayan: And

Aparna Pillai: you

Ananthu Vijayan: That's

Aparna Pillai: Hello

Ananthu Vijayan: wonder.

Aparna Pillai: for

Ananthu Vijayan: I learned

Aparna Pillai: a climate process. foreign

Ananthu Vijayan: 50% where someone officially

Aparna Pillai: mission rule. Uh Okay, now about our converations and

Ananthu Vijayan: main That's

Aparna Pillai: the change.

Ananthu Vijayan: from home.

Aparna Pillai: Okay.

Ananthu Vijayan: Obviously

Aparna Pillai: Office

Ananthu Vijayan: because

Aparna Pillai: confirms 26

Ananthu Vijayan: Open. Uh

Aparna Pillai: for

Ananthu Vijayan: um four packages.

Aparna Pillai: ID room. Hi dear woman recruitment recruitment from

Ananthu Vijayan: Oh.

Aparna Pillai: homeates.

Ananthu Vijayan: Uh spirit.

Aparna Pillai: Fore

Ananthu Vijayan: Um

Aparna Pillai: from home. disturbance.

Ananthu Vijayan: Oh,

00:47:33

Aparna Pillai: Uh so we got permission to use this room for full one week.

Ananthu Vijayan: hey.

Aparna Pillai: Idea room is occupied for a week of time. Please use other conference rooms if they

Ananthu Vijayan: Okay.

Aparna Pillai: need.

Ananthu Vijayan: Okay.

Aparna Pillai: sending the message.

Ananthu Vijayan: Mhm.

Aparna Pillai: Uh

Ananthu Vijayan: I think

Aparna Pillai: So you use use it

Ananthu Vijayan: Oh.

Aparna Pillai: to use this room.

Ananthu Vijayan: Um.

Aparna Pillai: We are working on a personal project for him. I guess

Ananthu Vijayan: Okay, good.

Aparna Pillai: Okay. Where in

Ananthu Vijayan: Um,

Aparna Pillai: England,

Ananthu Vijayan: okay. Okay.

Aparna Pillai: WhatsApp

Ananthu Vijayan: Ouch.

Aparna Pillai: WhatsApp.

Ananthu Vijayan: Okay. Okay. Thank you.

Aparna Pillai: Thanks.

Ananthu Vijayan: Yeah.

Aparna Pillai: Hello. Hi.

Ananthu Vijayan: Amen.

Aparna Pillai: Hiring.

Ananthu Vijayan: Um, Okay.

Aparna Pillai: forward.

Ananthu Vijayan: Oh,

Aparna Pillai: It is

Ananthu Vijayan: there you go.

Aparna Pillai: interesting. Fore

Ananthu Vijayan: BC.

Aparna Pillai: speech.

Ananthu Vijayan: Uh

Aparna Pillai: Fore

Ananthu Vijayan: yeah.

Aparna Pillai: message.

Ananthu Vijayan: Um

Aparna Pillai: for

Ananthu Vijayan: uh and I'm paran

Aparna Pillai: take the elevation. London.

Ananthu Vijayan: Hello. I don't

Aparna Pillai: Okay.

Ananthu Vijayan: I

Aparna Pillai: Okay.

Ananthu Vijayan: think

Aparna Pillai: message.

Ananthu Vijayan: okay.

Aparna Pillai: Okay, thanks Anandu.

Ananthu Vijayan: Thank you. Bye.
