Meeting records Transcript

Summary

Discussions centered on narrative structure, character development, and technical workflows for film production with AI integration.

Framework and Narrative Structure
Adopting the SB7 framework ensures a character-driven narrative grounded in historical Indian settings. The team decided to frame the film around a cohesive sea-based beginning and ending.

Character and Visual Design
Mentorship roles shifted to a Catholic priest to enhance thematic alignment, while characters require distinct visual aging processes. Grounded realism remains essential for both prison environments and character portrayals.

Technical Workflow Optimization
ElevenLabs provides voice overlay solutions alongside 720p resolution rendering for efficient review cycles. High-quality production standards demand manual corrections for AI-generated visual inconsistencies.

Decisions

Aligned

- **Film opening and closing structure** The film structure is defined to begin and end with scenes featuring the sea.
- **Mentor character role defined** The mentor character role is established as a Catholic priest to utilize the Anthony shrine connection.
- **Trailer content strategy** Treasure and water/oil elements are excluded from the trailer to maintain suspense.
- **Character design standards** Characters will feature distinct young and old versions, with the young versions designed to be lean, approximately 20 years old, and featuring high cheekbones.
- **Character story location** The story setting is moved to Kochi for the character locations.
- **Video production workflow** The video production workflow is set to generate 720p drafts for verification before final 4K conversion to save resources.

We've **updated the Decisions section** using your feedback.

Let us know what you think: Helpful or Not Helpful

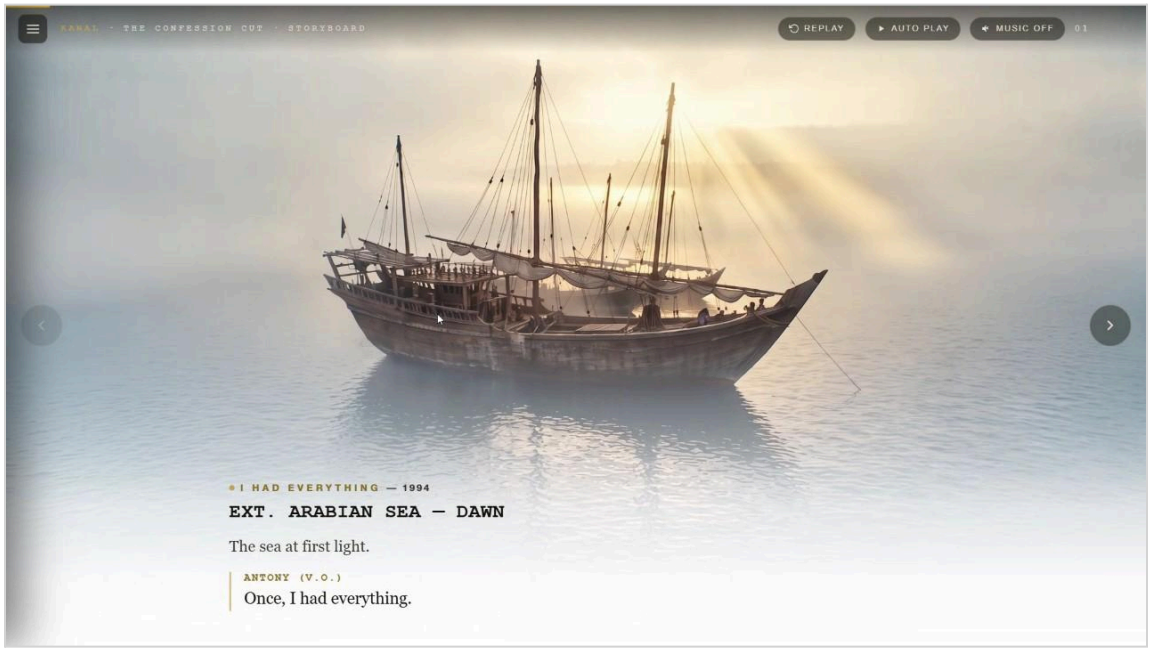

Next steps

- ☐ [Ananthu Vijayan] : Update character profiles to include both young and old versions. Adjust the hero appearance to look authentically younger and update the name accordingly.
- ☐ [Ananthu Vijayan] : Move the movie opening away from the sea sequence. Structure the narrative to start and end at the sea.
- ☐ [Ananthu Vijayan] : Produce all initial video clips in 720 pixel resolution for team review. Perform 4K conversion only after each scene is verified.

Details

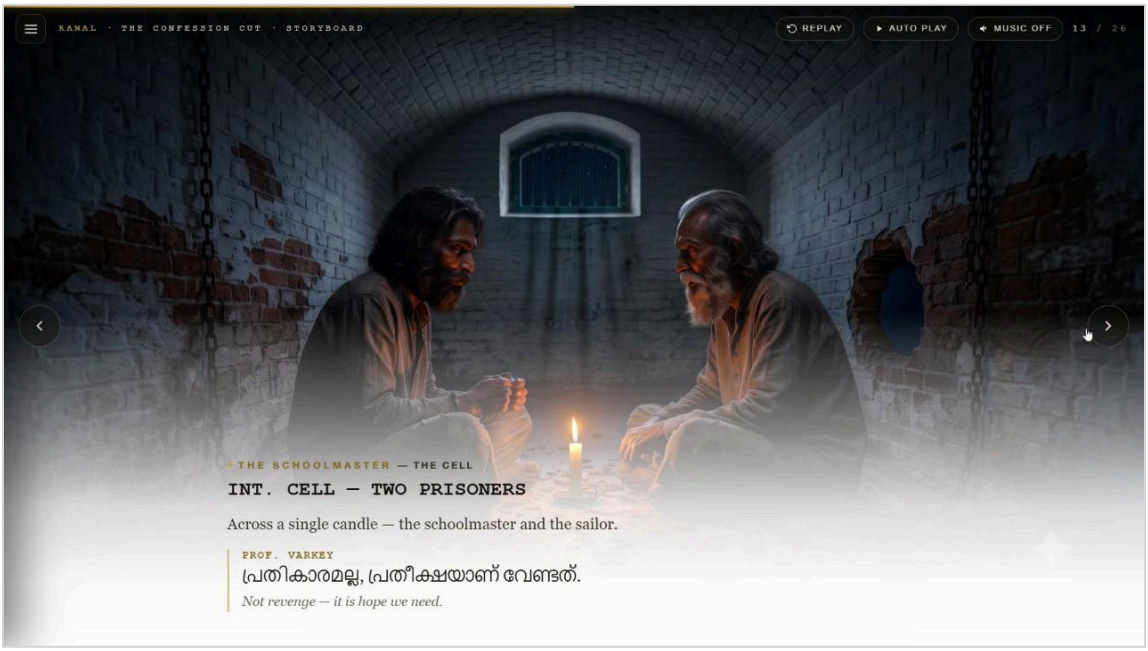

Did the screenshots in this section make your notes better or worse?

- **Movie Framework and Narrative Structure**: Philip Samuelraj and Ananthu Vijayan discussed adopting the SB7 framework for the movie, which outlines a character arc moving from a carefree life through a major problem to finding a guide, securing treasure, and achieving revenge. They agreed to Indianize the story for both Malayalam and Tamil versions while maintaining a cohesive historical setting (00:07:04). Philip Samuelraj emphasized a narrative structure that begins and ends at the sea, reinforcing this by requesting the removal of the initial boat scene from the opening to ensure the film closes with a yacht scene (00:08:24).

- **Character Development and Thematic Integration**: Philip Samuelraj recommended changing the mentor character from a school master to a Catholic priest to better align with an Anthony shrine setting, where the priest could guide the protagonist toward a secret treasure path (00:10:46). They discussed incorporating a "life framework" into the film that covers themes such as love, civility, learning, and the value of hard work, which could be developed

through scenes in the prison library (00:12:03). Philip Samuelraj stressed that the prison environment must remain grounded and realistic, avoiding any fantasy-like elements (00:09:26).

- **Visual Consistency and Character Aging**: Philip Samuelraj instructed that the younger and older versions of characters should look distinct enough that they are not immediately recognizable as the same person, citing the PBS series as a successful example of this approach (00:14:24). For the younger protagonist, they specified an age of approximately 20, requiring a lean appearance with high cheekbones (00:16:53). Philip Samuelraj cautioned against using the likenesses of real people for characters to avoid legal and social issues, suggesting that characters should instead be established in settings like Kochi or business environments in Dubai (00:18:31).
- **Technical Workflow and Video Generation**: Ananthu Vijayan identified that the current platform lacks native language support, so they will use ElevenLabs for voice overlays in the trailer (00:20:39). To optimize credit usage, they agreed to generate all scenes in 720p resolution for review and verification before converting finalized scenes into 4K. Philip Samuelraj and Ananthu Vijayan also reviewed AI-generated content, noting that while the quality is generally high, they must correct specific errors, such as a character's incorrect eye gaze and the need for realistic background details like the Indian flag on fishing boats (00:22:29).

- **Long-term Vision and AI Perspective**: Philip Samuelraj outlined a vision for 2027, proposing the development of a platform built on top of foundational models that allows scriptwriters to produce high-quality movies. The team discussed the need for Indian cinema to incorporate the level of detail typically found in Hollywood productions, noting that their recent work with AI has made them more observant of AI-generated content in mainstream media (00:25:24).

00:04:23

Philip Samuelraj: Hey Nu, how are you doing?

Ananthu Vijayan: I'm good.

Philip Samuelraj: Cool. I think Aparna should be joining too, right?

Ananthu Vijayan: Just bring home.

Philip Samuelraj: All right,

Ananthu Vijayan: I

Philip Samuelraj: here we are. Uh, let's go ahead Ananthu. How what are things that I can help you with?

Ananthu Vijayan: uh like the story about you said was like there are some suggestions from you.

Philip Samuelraj: Yeah. Yeah. Open it up. I have a few suggestions. Open it and walk through and I'll show you a few solutions. Yeah. Um yeah, this the boat scene opening with the boat scene is really cool. Okay. Even with the um uh what you call it with the movie timeline, right? One of the things that we can actually even finish the Did you finish the PBS series? You got a lot more gist on the story, right? Cool. What are things that you uh insights that you got that we can incorporate into the story from the series?

00:05:52

Ananthu Vijayan: the series. I think uh like as you said he's using the other like them itself to the uh thing actually. So initially uh I I said to you know like we can have some masala items and all the fights and all. I think that won't work if we are following this thing.

Philip Samuelraj: No, we'll keep it open. Okay. It's all about can we quickly create something that is entertaining as well. See there are a few things that we want to achieve. One movie should come across very realistic. That in itself is a phenomenal achievement.

Ananthu Vijayan: Um

Philip Samuelraj: Number one. Okay. Number two and that is made by Techjays first off would be like oh this

Ananthu Vijayan: yeah.

Philip Samuelraj: IT company is now creating movies and it is ridiculed. That's the first part right? Oh, we should come. The second part is we're taking a story that is universally loved. You understand that, right? It's a universally story. It's one of the most famous novels on the planet earth because people love

00:07:04

Ananthu Vijayan: H

Philip Samuelraj: this that it's the same. Did you look at the SB7 framework? You saw that same SB7 framework, right? It's the same.

Ananthu Vijayan: Damn.

Philip Samuelraj: This is a good guy. He is carefree. Everything is going good for him in life. He meets a very big problem. He goes to the worst state a human being can be. There he meets a guide who somehow sets him up on a path.

Ananthu Vijayan: All right.

Philip Samuelraj: He gets a lot of treasure and then he comes back. Ultimate reven story. This is the ultimate reven story. We need to actually Indianize it very specifically on both versions. First we were working on a malala version right malalum version make it fully local and then

Ananthu Vijayan: Okay.

Philip Samuelraj: I'll I have ideas also to make it fully tamil local as well fully

Ananthu Vijayan: Oh,

Philip Samuelraj: low and the other part is we are

Ananthu Vijayan: okay.

Philip Samuelraj: using his historically that's set in the 19th century with Napoleon and everything we are set in the 21st century and the 20th century we should use the same historical loops same locations and it should all come together cohesively right that's the part so

00:08:24

Ananthu Vijayan: Huh?

Philip Samuelraj: that is that is again I want to reiterate and first off for the trailer I think many use fast cuts and narration and so on the trailer as well should be like wow didn't know we can we can this can happen and then we'll work even

Ananthu Vijayan: Oh,

Philip Samuelraj: much more detail on the story

Ananthu Vijayan: okay.

Philip Samuelraj: Okay.

Ananthu Vijayan: Oh.

Philip Samuelraj: So for me, if you can move the first opening from the sea because I want to actually in the movie I want to close it with the yacht. It starts. from a C ends with a C. Okay,

Ananthu Vijayan: Uh

Philip Samuelraj: it's kind of like the same in the here also. Start from the series will start and it'll end by the C only. Start by the C, end with a C. So this is this is good.

Ananthu Vijayan: there.

Philip Samuelraj: Move next. I we'll then review the characters and all this is also good like hey be there.

Ananthu Vijayan: Yeah.

Philip Samuelraj: Um we'll come to the characters and I'll discuss more.

00:09:26

Philip Samuelraj: This part is also

Ananthu Vijayan: I'll check

Philip Samuelraj: This is also good. This concept is very good.

Ananthu Vijayan: Huh?

Philip Samuelraj: Concept is also good. Next concept is good. Okay. Actually, okay. This is actually a little bit of a f remembering, right? What happened? Okay. Next.

Ananthu Vijayan: Yeah,

Philip Samuelraj: Uh,

Ananthu Vijayan: is also a part of that remembering

Philip Samuelraj: next.

Ananthu Vijayan: process.

Philip Samuelraj: This is good. Nice. Um,

Ananthu Vijayan: So like I

Philip Samuelraj: and the same local we have to make it like a Kerala jail or a Tamara jail as well. It can't be super f like a fantasy.

Ananthu Vijayan: Okay.

Philip Samuelraj: Okay.

Ananthu Vijayan: Okay.

Philip Samuelraj: Next.

Ananthu Vijayan: So, oh, I wanted to show something like the time is going. So, for that uh I think we need to plan something like years passing by.

Philip Samuelraj: Okay. Oh, one more thing. This is another thing that I also thought of. So, we are using the island of Kativa Island.

00:10:46

Philip Samuelraj: Okay. The only building there is actually a Catholic church. Oh, why don't we actually keep this character instead of a school master or a professor to be a cath priest because that will add very

Ananthu Vijayan: Okay.

Philip Samuelraj: well to the story and the priest the priest has spent many years as an educator and all somehow somebody blamed him put him in prison as well. He's also somewhere you know not supposed to be in prison.

Ananthu Vijayan: Huh?

Philip Samuelraj: uh this guy is also not supposed to be in prison but this guy starts teaching and so on and the refining and he gives that story which is hey this is a

Ananthu Vijayan: Oh.

Philip Samuelraj: shrine I was there I know and there is a secret path in that shrine which you have to go you you can go and collect your treasure okay don't forget to do that and

Ananthu Vijayan: Yeah.

Philip Samuelraj: so on and some of the things like hey you you have to do what is good concepts around revenge concepts around this.

Ananthu Vijayan: Huh?

Philip Samuelraj: Here I have something also which is um there should be a life framework that the priest actually uh talks about to this guy.

00:12:03

Philip Samuelraj: Okay. What it means to be in love, what what what it means, you know, to for love. What it means to be uh you know, have civil nicities, to how to treat

people and all of that. What it means to actually dream big and do something. What it means to learn what even learning means, right?

Ananthu Vijayan: All

Philip Samuelraj: and actually teach them what hard work really means, what creation means, all of those things. The should be woven into this in a very short frame,

Ananthu Vijayan: Okay. Okay.

Philip Samuelraj: right? And the other part that we can even add is like maybe not for the trailer or so,

Ananthu Vijayan: Yeah.

Philip Samuelraj: they start reading from the prison books. Prisons have libraries and all, right? The library, they learn and so on. Okay. Okay. And next.

Ananthu Vijayan: Okay.

Philip Samuelraj: Ah. This is all good. This is very good. This is a tsunami. Okay. Yeah.

00:13:23

Philip Samuelraj: and then 2026. Okay, this is all good or 2025 or something like that as well. Whatever it is, 2024, whatever it is,

Ananthu Vijayan: Okay.

Philip Samuelraj: market.

Ananthu Vijayan: This like like we are showing the villain characters and the voice over will be backing up the scenes

Philip Samuelraj: Yeah. Okay.

Ananthu Vijayan: actually.

Philip Samuelraj: Whatever it is. Yeah.

Ananthu Vijayan: Oh.

Philip Samuelraj: Next. Okay, one more thing. Go back because this is the part that I was thinking, right? See the uh most recent you can use just like this,

Ananthu Vijayan: Oh.

Philip Samuelraj: you know, just by maybe a little bit of a touchup however you want the character to be. We'll come over to the image discussions, right? But the younger version, I don't want it to be as similar.

Ananthu Vijayan: Okay. Okay.

Philip Samuelraj: You can take some artistic liberties. It should also be that people initially they see they should not recognize.

Ananthu Vijayan: Oh,

Philip Samuelraj: You understand?

Ananthu Vijayan: okay.

Philip Samuelraj: Not only from a face initially they should not be able to recognize.

00:14:24

Ananthu Vijayan: Okay.

Philip Samuelraj: Plus also um uh the refined mannerisms uh the all of those things people would not even guess. And the PBS series had done it really well. Did you see that the young guy has like long hair, clean shaven, very raw when he comes in like with the beard and very manicured beard and a stately appearance. You were thinking in the previous series if I had met this guy as a young guy and I met these guy you won't even put you won't add both of them and say these are the same person. You understand?

Ananthu Vijayan: Okay.

Philip Samuelraj: If you're after 20 30 years you won't add as the same person.

Ananthu Vijayan: H.

Philip Samuelraj: It is that different.

Ananthu Vijayan: Okay.

Philip Samuelraj: You get it right? That's the way we it should be.

Ananthu Vijayan: Yeah.

Philip Samuelraj: Um I actually don't like the mask concept in u uh the French one. Okay. Next. Okay. On then back. Cool. Maybe the gold and treasure we don't show in the trailer.

00:15:51

Ananthu Vijayan: Yeah,

Philip Samuelraj: The this water oil elements we keep as suspense. Next.

Ananthu Vijayan: I think only we have this

Philip Samuelraj: Wonderful.

Ananthu Vijayan: much.

Philip Samuelraj: Wonderful. So, this is all good. I think we are almost aligned. We'll start seeing the Can you show the character cut? I wanted to show it

Ananthu Vijayan: like in the sense like the video which we made yesterday or I said library.

Philip Samuelraj: library. Uh this is where I wanted to say and you take as much liberties

Ananthu Vijayan: Okay.

Philip Samuelraj: with all of the other characters. Okay.

Ananthu Vijayan: Okay.

Philip Samuelraj: uh the priest as well make sure they they are a priest because they Anthony shrine connection is there and so on for the hero change the name right what name we use for

Ananthu Vijayan: Oh,

Philip Samuelraj: uh it's not Philip or so on name and also uh change a bit more of the face the young face make it genuinely younger it all

Ananthu Vijayan: okay.

Philip Samuelraj: looks slightly older right make it genuinely Like what is it?

00:16:53

Ananthu Vijayan: Uh,

Philip Samuelraj: Um before the arrest you should be like 20 or something and no fat on

Ananthu Vijayan: okay.

Philip Samuelraj: cheekbones. High cheekbone. The cheekbones should show like that.

Ananthu Vijayan: Okay.

Philip Samuelraj: Very

Ananthu Vijayan: Okay.

Philip Samuelraj: lean. Lean and authentic.

Ananthu Vijayan: Okay.

Philip Samuelraj: Okay.

Ananthu Vijayan: Okay.

Philip Samuelraj: Prison I think all you can you can show the same evolution towards the beard and so on as the young and then the refined look is

Ananthu Vijayan: Oh,

Philip Samuelraj: cool.

Ananthu Vijayan: okay. Okay.

Philip Samuelraj: Sounds good.

Ananthu Vijayan: Yeah. Yeah. Oh, this character like uh I got one comment from Aparna. So, I'll be refining it actually.

Philip Samuelraj: Oh yeah, the other characters you refine accordingly. Aparna will provide even much better

Ananthu Vijayan: Okay.

Philip Samuelraj: feedback.

Ananthu Vijayan: Okay.

Philip Samuelraj: Okay. And for the all of the characters,

Ananthu Vijayan: Yeah.

Philip SamuelRaj: there should be a young version and an old version.

Ananthu Vijayan: Oh, yeah.

Philip SamuelRaj: Right.

Ananthu Vijayan: So it goes out there

00:18:31

Philip SamuelRaj: Good.

Ananthu Vijayan: actually.

Philip SamuelRaj: Good. And the older versions, many of them become successful. So that also needs to okay see wherever we

Ananthu Vijayan: Uh okay. Yeah.

Philip SamuelRaj: are maybe you can move all of those from there to Kochi this location maybe everybody is you know moved to Kochi they have businesses in Dubai something like that sounds

Ananthu Vijayan: Okay. Okay. Yeah. Yeah. I have seen him somewhere that I need to check Google image or something.

Philip SamuelRaj: He real people. Okay. Then that will become a big problem. We have to create people who are real.

Ananthu Vijayan: Uh yeah.

Philip SamuelRaj: Okay, real time high court guy story for us.

Ananthu Vijayan: Yeah.

Philip SamuelRaj: Those guys get very mad.

Ananthu Vijayan: And this is the priest actually.

Philip SamuelRaj: Yeah. Okay. All right. Any other questions you have for me?

Ananthu Vijayan: No, I think uh the only difficulty that we'll be facing is uh like in in this platform which we are making the video uh our native language won't be supported.

00:20:39

Ananthu Vijayan: So currently they are having English only I think. So for the trailer it won't be a problem. We can use level 11 laps and have the voice overlay. But for the real thing we need to plan for something.

Philip Samuelraj: Cool. Anything else you have in mind?

Ananthu Vijayan: Yeah. Did you see the video we generated yesterday? Like any comments on that? Uh like is it looking realistic or do we need to uh refine something like that? All

Philip Samuelraj: Let me take a look.

Ananthu Vijayan: right.

Philip Samuelraj: The first and all is okay. Do all fishing boats also have like an India flag like that?

Ananthu Vijayan: H most of the

Philip Samuelraj: Yes. Right. Most of them have.

Ananthu Vijayan: Yeah.

Philip Samuelraj: Right. Okay. Okay, that is good. The first two is okay. Even the dolphins and all are really cool.

Ananthu Vijayan: Yeah.

Philip Samuelraj: We can show one car with the guy, you know, looking into that is also a really cool concept.

00:22:29

Philip Samuelraj: Just the character of it with the uh the only part is this guy is turning here. This one right here. this this video you see the AI does some mistakes like this. This is the direction that you know the hero is looking and waving but he is actually waving

Ananthu Vijayan: Okay.

Philip Samuelraj: onto the camera. It should be just straight up if something is but overall I think quality wise it is very

Ananthu Vijayan: Okay. Okay.

Philip Samuelraj: good right uh I mean good right

Ananthu Vijayan: I think it's doing good out like

Philip Samuelraj: h

Ananthu Vijayan: Hixfield is providing uh unlimited generation for 720 pixel. So what I planned is like all the scenes we can generate in 720 pixel and we can verify we can confirm and after confirming we can convert to 4K.

Philip Samuelraj: 4K.

Ananthu Vijayan: So that will save credits.

Philip Samuelraj: Oh, fantastic. Let's do that that way. See,

Ananthu Vijayan: Yeah.

Philip Samuelraj: even with 720p, if we are able to build like a,

Ananthu Vijayan: Yeah.

00:23:35

Philip Samuelraj: hey, these are all the scenes, it all looks good. Then exactly go and do the same thing at 4K.

Ananthu Vijayan: Yeah.

Philip Samuelraj: Lovely. Lovely.

Ananthu Vijayan: So after the character updates you mentioned we can start the generation works. Idea generation. works. Okay.

Philip Samuelraj: Yep.

Ananthu Vijayan: Okay.

Philip Samuelraj: Cool. Anything else? Any other questions for me?

Ananthu Vijayan: No, no, nothing for

Philip Samuelraj: upon anything that I should address all

Ananthu Vijayan: me.

Philip Samuelraj: good.

Aparna Pillai: I don't

Philip Samuelraj: You think this will be super

Aparna Pillai: least we would be so happy

Philip Samuelraj: if we are not building this to be super we don't have the belief then how will people they don't come

Aparna Pillai: not it is something you wanted to do we all wanted to do is super interested right so

Philip Samuelraj: across

Aparna Pillai: we would be really happy I say something we all are dreaming about and then doing

Philip Samuelraj: See the first part is hey that we can originally come up with something very

00:25:24

Aparna Pillai: Okay.

Philip Samuelraj: creative that is the per first part we need to come and hit the market because this is what I think will happen in 2027.

Aparna Pillai: What?

Philip Samuelraj: We can build a platform on top of even all these models which are see all of these guys are using foundational models only right. We can build a platform on top of all of these models for people who are really good script writers. They should actually come over here and then be able to create a real good movie and that's it. I don't know how much Indian movies are mood and all because I used to watch uh movies when be up to date only in my college days 2005 maybe after that and all such even I I was just checking looking for some scenes and all lot of those have just a melodrama they don't have a lot of detail um that Hollywood typically looks for. A lot of those seem to be standard sets, standard things that they are reusing, standard plays and so on. Correct, Ananthu?

Ananthu Vijayan: Yeah, mostly

Philip Samuelraj: Anything else you want to add up?

Aparna Pillai: after we started doing so many videos we are seeing in uh YouTube and everywhere right then I'm seeing oh maybe this is also AI generated that is also AI generated that way I was never paying attention to that but now since we

Philip Samuelraj: Right.

Aparna Pillai: started to do it uh everywhere I'm seeing

Philip Samuelraj: Yeah. And the other part is also you saw they had Spidey's wedding Tom Holland's wedding video.

Ananthu Vijayan: Oh, yeah. Yeah. They're waiting video.

Philip Samuelraj: You saw they did h see if you can actually show it to somebody who doesn't know about AI they won't even know realize that it is not AI. They'll say look those white people are getting married in in South India. Yes or no? That is the level it has come to. We'll make some magic. Okay. Awesome. Awesome. Same way

Aparna Pillai: Thanks for doing this.

Ananthu Vijayan: I'm getting buddy.
